

Colour matching activity

PAPER TYPE

Decide what type of paper you are going to use to print these on. Thicker printing paper or card would be better to use.

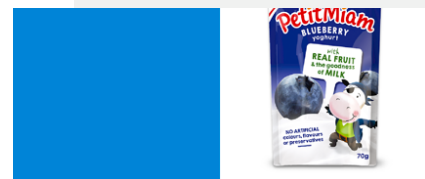

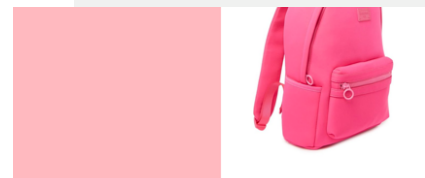

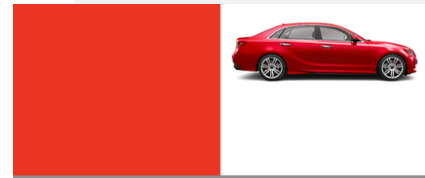

PRINTING

If you have downloaded this to print and make yourself use the following printing options to maximise the paper space to make reasonable size flashcards

- Paper orientation: landscape
- 4 pages per sheet
- colour

MAKING THE CARDS

Once you have the cards printed and cut, you can leave them as is or if you have a laminator, laminate them for longer use.

Colour matching activity

ACTIVITIES YOU CAN DO WITH THEM

Activity 1: Lay the colour cards in a row and go through each image. Say the name, the colour and place it under the correct colour card. After doing a few of these to demonstrate, ask your little one to join in and help sort.

To make it more independent: Lay out the colour cards in a row. Show one image card at a time, say the name and ask what colour it is. Once your little one recognises the colour, get them to place it on the right colour card.

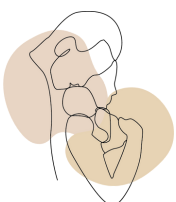

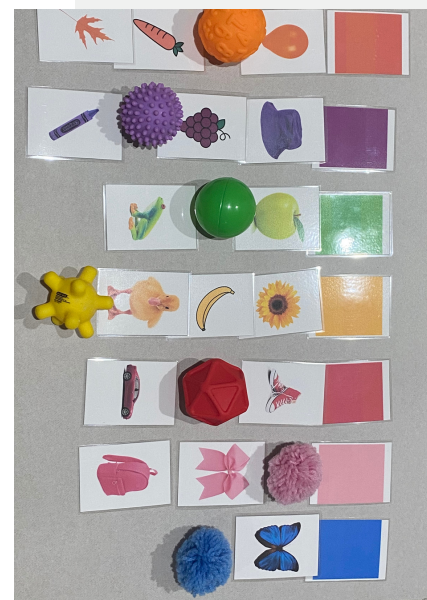

Activity 2: Swap out some of the image cards for real life objects. Lay out the colour cards in a row. Show one image card or object at a time, say the name and ask what colour it is. Once your little one recognises the colour, get them to place it on the right colour card.

Activity 3: Fill a basket of different coloured toys/objects and let your little one sort them into the different colour groups.

Activity 4: Colour scavenger hunt! Give one coloured card at a time and have your little one go find one object around the house to match. Or have them take you around to find matching items.

Notes:

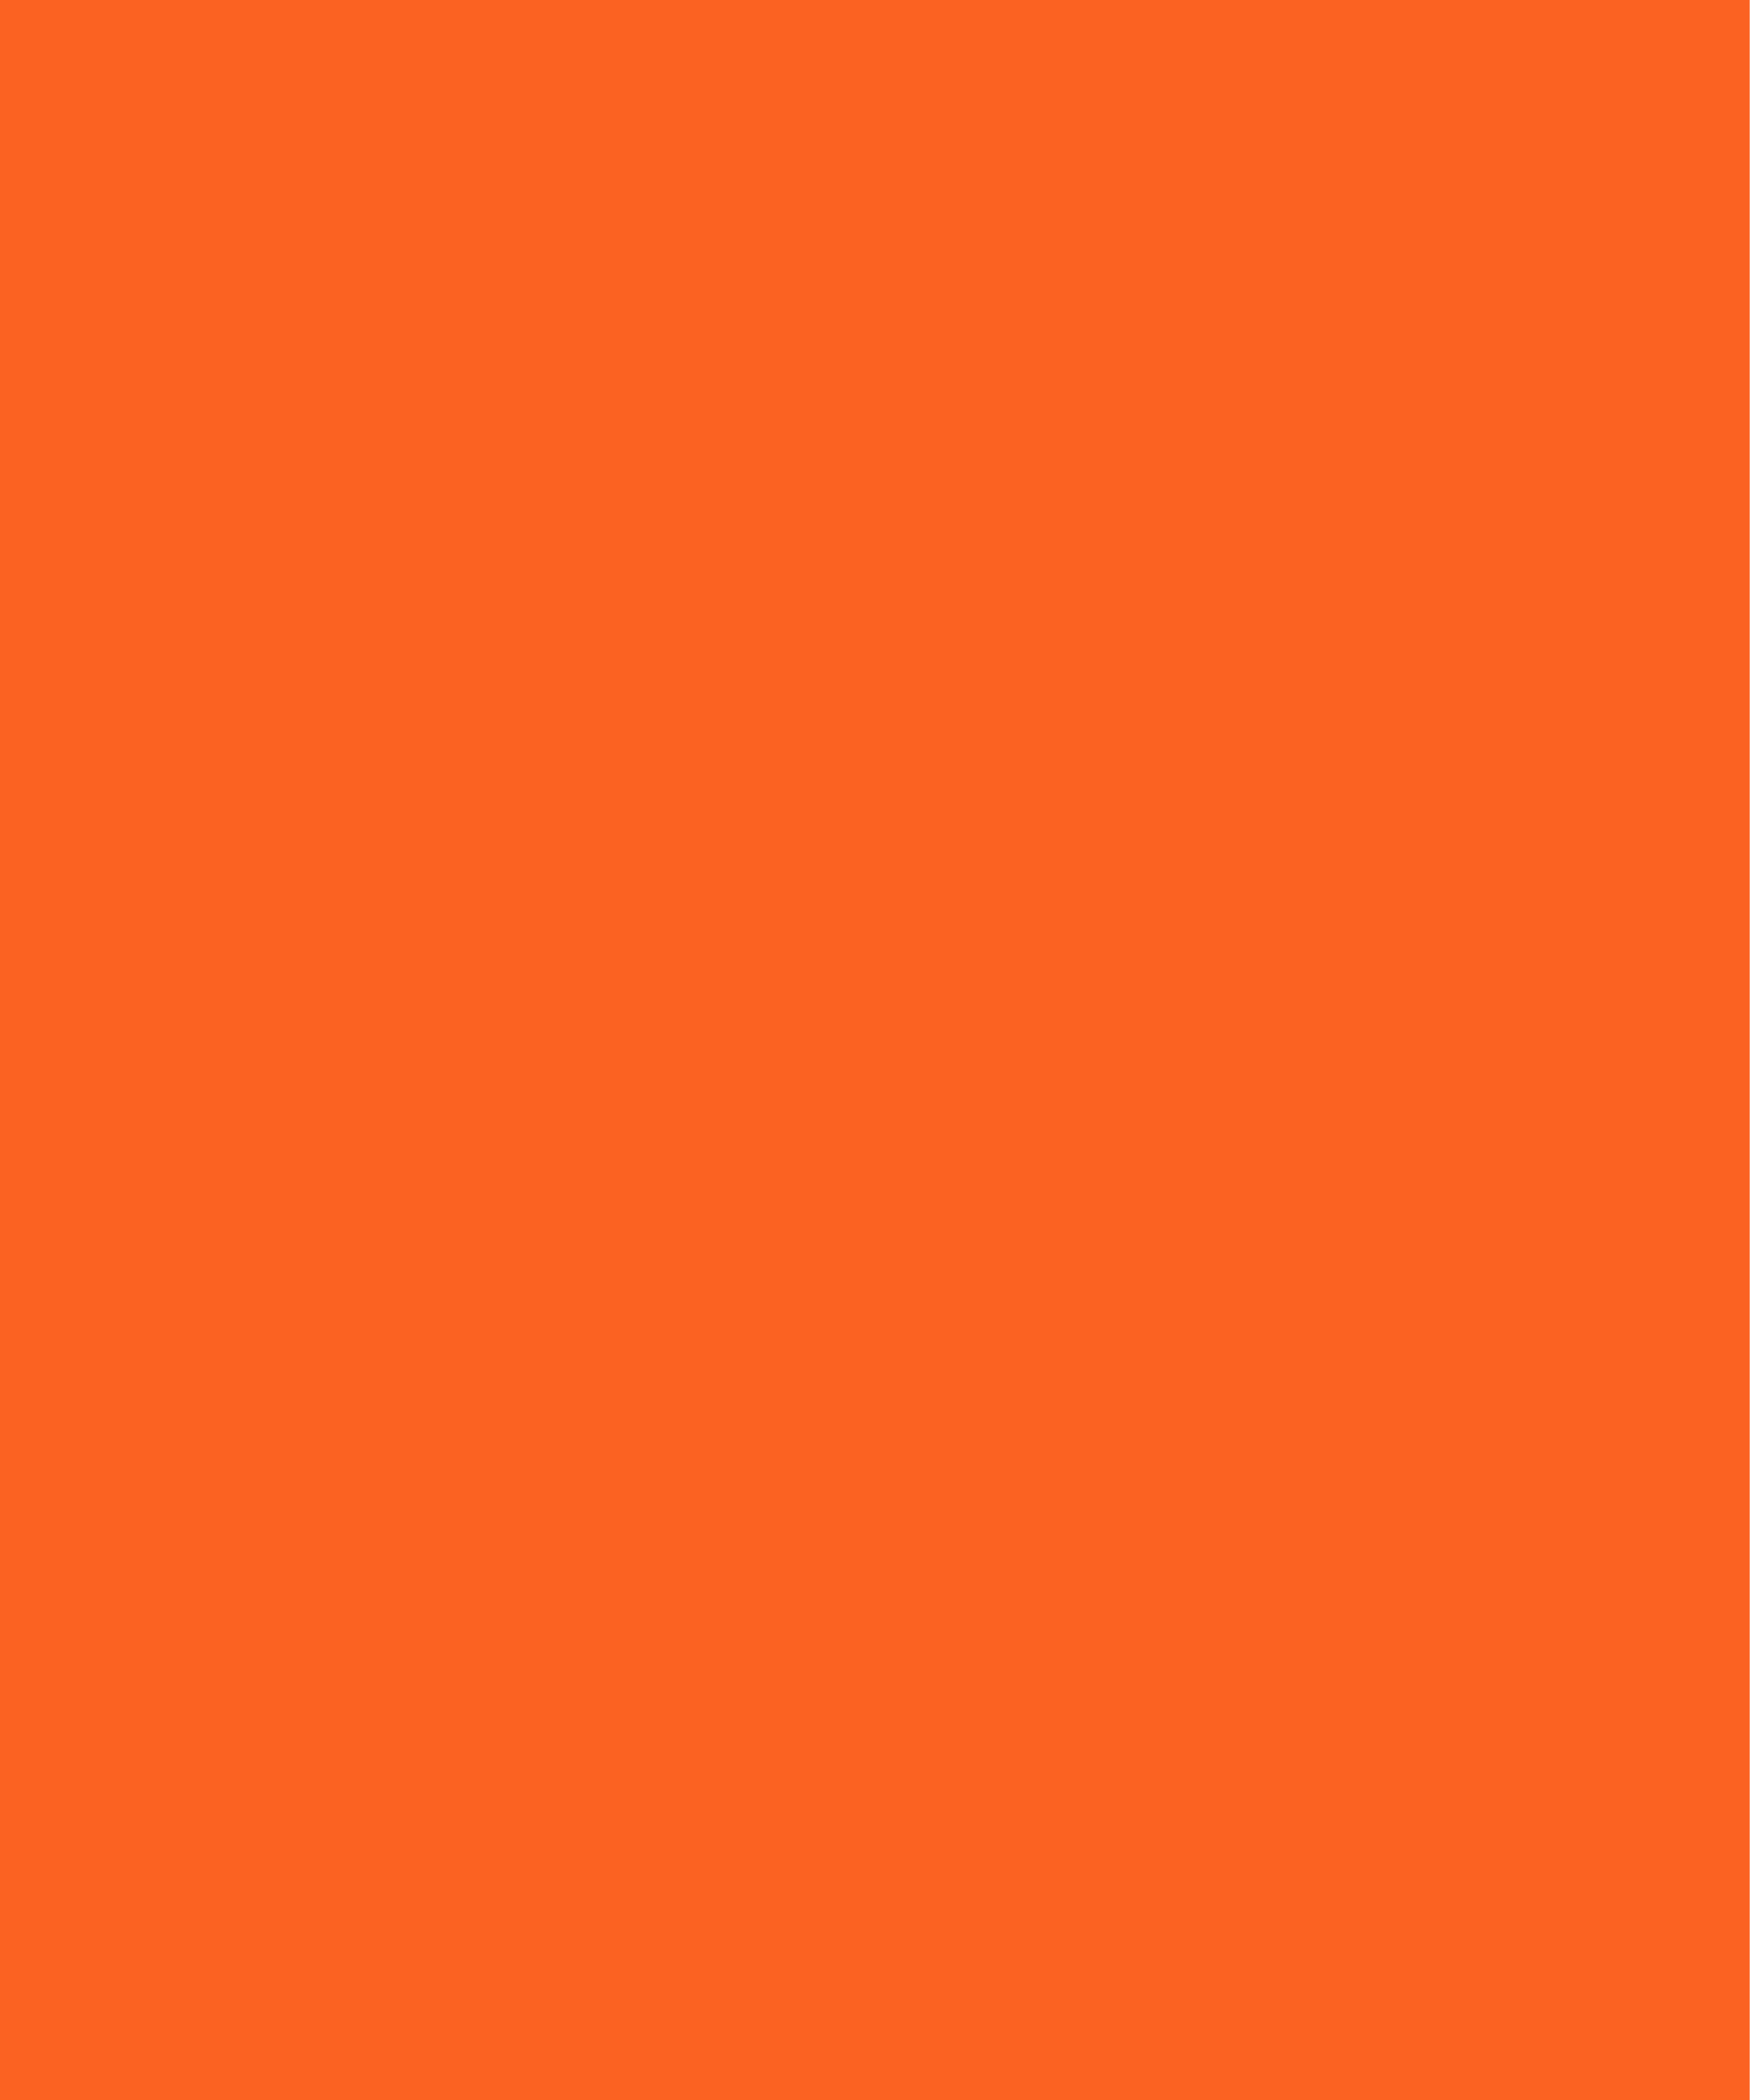

You can make this as challenging as your little one can handle. For example: only focus on 1-2 colours at a time and build up from there.
